

Mieciak Mateusz

**shaping brands,
tools, and
interactive
experiences**

I've worked with agencies, shaped brands, independent collectives and created reusable tools. Whether producing a motion, developing a digital experience or designing a brand system, I aim to turn ideas into clear communication creating memorable and engaging outcomes.

Combining multiple years behind the computer as well as work behind the camera and production I thoroughly understand the whole creative pipeline. Always happy to learn new skills, share knowledge and use it while making great design

**from idea to
execution**

I help organizations prototype, communicate, create and document ideas through design, images, motion and interactive media.

**Creative
Technologist &
Careful Designer**

Web Motion Animation
Photography Poster

bladr

animation from
photos of books

challenge

Refresh Bladr’s online presence and create motion content for their anniversary campaign. Migrating webshop and blog to another platform and updating theme to match the visual language.

approach

Co-developed the new website direction and implemented interactive animations that reference the tactility of printed matter. Produced motion pieces and social media assets for the anniversary celebration.

outcome

A renewed digital identity that connects Bladr’s experimental spirit with a clear, cohesive online experience.

The consistent visual language and platform is still being used to present the books online.

video ad

challenge

Communicate to the customers that Brdr Krüger's furniture could be customized in materials and finishes.

approach

Created an interactive AR filter allowing users to visualize different chair finishes in real time, supported by high-quality renders and a process video for the campaign.

outcome

The tool and campaign visuals helped communicate flexibility and craftsmanship, increasing engagement and client awareness during launches.

Identity Motion System

Lucyna

challenge

Create a coherent visual, spatial, and organizational identity for an independent art and music initiative evolving across formats — from small gatherings to full-scale festivals. As co-founder and creative lead since 2018, I developed Lucyna as a festival and label combining visual communication to stages and workshops.

approach

Carefully balancing collective vision with Lucyna's identity and curation to create room for artistic expression. I worked with interdisciplinary teams of artists, designers, and performers, while handling art direction, branding, web presence, and physical production.

outcome

Lucyna became a recognizable cultural platform known for its strong curation and open, fun atmosphere, hosting recurring events that blend music, design, workshops, and collective experimentation.

Obra Press

mockup of UI

challenge

Translating digital artwork into Riso prints often involves guesswork - the unpredictable overlap of inks makes it difficult to imagine results before printing. Especially for beginners. The goal was to create a tool for workshops that visualizes this process and supports experimentation while reducing material waste.

approach

Developed an interactive web-based interface that mimics the behavior of Riso printer, allowing users to preview layers, overprints, and textures from mobile device. The system was built as an open and educational tool to workshop participants understand how their pictures can look on CMYK-based Riso processes and dithers.

outcome

The prototype became both a creative playground and a practical production aid for small print studios and independent artists. It bridges digital and analog workflows, making print design more accessible, sustainable, and transparent.

Bridging digital design and physical print through real-time color modeling

Radio Lato

mockup

challenge

Production and design of an hour long, sampled textures, and spoken radio skits - with visual artwork that reflects the record's nostalgic. The project required imagery that could bridge sound and visual culture while honouring the limited - edition cassette format and the label's independent ethos.

approach

Designed the album's visual identity in collaboration Superkasety Records. Incorporating hand-drawn motifs that evoke the warmth and layered emotional tone of the music. The graphics were with mix of analog textures, 3d graphics and generative techniques mirroring the collage techniques in used in the music.

outcome

the limited-edition cassette, music videos and visuals and supported its release through both physical and digital channels. The visual design became part of the album's identity, connecting listeners to the project's layered sonic world. Sold out in one day.

Participatory Rapid
Web Design Sustainable

waterlike.tools

challenge

Develop a digital-physical practice that empowers people to create everyday objects using local, recycled, and homemade materials. The goal was to encourage accessible, regenerative creativity rooted in community and ecological awareness.

approach

Conceived and designed waterlike.tools as a knowledge co-creation and pop-up community. Combining digital tools with physical workshops. The project emphasizes upcycled materials, transparency, and collective design processes.

outcome

The practice functions as both an educational and creative ecosystem, connecting local materials, people, and ideas. It has been presented and tested at events in Copenhagen and Warsaw as well as in Circular Lab @ Roskilde festival engaging participants in co-creation and sustainable experimentation.
